

Inglewood Community Nursery and Infant School Geography Vision

Geography at Inglewood equips children with the necessary skills and knowledge to explore, question and appreciate the world around them.

At Inglewood Nursery and Infant School, our geography curriculum inspires children to explore, question and appreciate the world around them. We nurture a sense of curiosity about places, people and environment, helping every child understand their role as a global citizen. Through carefully planned, inclusive learning experiences, all pupils are supported to access and enjoy geographical learning.

Rooted in Rights Respecting School values, our curriculum empowers children to recognise that everyone has the right to be heard, respected and valued. We actively promote children's voices, using oracy as a powerful tool to build confidence, deepen understanding and develop the language needed to talk about their world.

Through our curriculum, extensive school grounds, clubs, stories and focus days, we teach the need to respect for our environment.

By fostering creativity, empathy and awareness of global diversity, we aim to equip our youngest learners with the knowledge, skills and attitudes to care for their community, respect the planet and celebrate the rich variety of people and places that make up our world.
