

At Inglewood Community Nursery and Infant School, our learning environment is creative and purposeful and supports our belief that everyone matters.

### **Early Years Curriculum:**

In Little Fawns, Skylarks and Little Owls, we set up our core provision and change it daily to best suit the children's responses to our stimuli. We call this 'in the moment planning' and, using a balance of adult-led and child-led activities, ensure that your child develops interests and enthusiasms in a wide range of pre-school activities and learning. Toward the end of your child's year in Little Owls, we begin the transition into Reception.

In our Reception classrooms, our learning environment encompasses playful learning and we plan activities appropriate to your child's needs through our topic-based curriculum. We also teach phonics, reading, writing, number, and shape and space alongside the topics.

Throughout the early years follow the [Early Years Statutory Framework](#) to ensure that your child's needs are met.

### **Key stage 1 Curriculum**

We build on the creative learning behaviours that your child has developed in the EYFS and continue our topic-based approach, as well as teaching explicit subject lessons such as English, mathematics, computing and physical education.

### **Whole School approaches:**

We teach phonics every day, using Letters and sounds in Little Fawns and Skylarks and Read Write Inc in Little Owls, Reception and Key Stage. We use Little Big Maths in the Early Years and Big Maths in Key Stage 1. We use a variety of quality reading schemes including Oxford Reading Tree, Rigby Star and Songbird and Ginn which are grouped into levels. Spoken language and writing is a particular focus throughout school and we use the lively Talk for Writing approach.

We support all our learners to develop behaviours for learning through using a Stop, Understand, Move-On (SUMO) approach. We complement this with our classroom management which allow learners to work individually, in pairs, in mixed-ability and in challenge groupings.
